An Illustration of Accelerating Distributions from IRAs
for Leveraged Lifetime Gifting Purposes

AN ANALYSIS PREPARED EXCLUSIVELY FOR

Jack & Jill Flash

Accelerated Distributions [\$70K/Year] + Gifts to Fund ILIT Premiums

Disclaimer

This financial plan is designed to provide educational and/or general information and is not intended to provide specific legal, accounting and/or tax advice. Any comparisons and projections including expected rates of return are presented for purposes of illustration only. Nevertheless, we believe that the comparisons as well as the other projections shown provide an important and valid basis for consideration when planning for your financial future.

IMPORTANT: *The projections or other information generated by this financial plan regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Results herein may vary with each use of the software tool(s) used to generate this financial plan and over time.*

The financial plan may contain ideas for your consideration concerning aspects of your life such as tax, retirement and estate planning, but these are not presented as, and must not be taken for, legal or tax advice. It is your responsibility to determine if, and how, the suggestions contained in the financial plan should be implemented or otherwise followed. You must carefully consider all relevant factors in making these types of decisions. For specific advice on these aspects of your overall financial plan, you should consult your professional tax and legal advisors. The report that follows is based upon:

- information and assumptions that you have provided or reviewed;
- current tax laws;
- appropriate financial planning concepts;
- historic asset class characteristics;
- additional assumptions and information discussed with your advisor.

The outcome of the analysis will be dependent to a significant extent upon the information and the reasonableness of the planning assumptions. It is your responsibility to provide accurate and complete information. Please contact your advisor with any changes to your information and/or planning assumptions. Inaccurate information and/or unreasonable planning assumptions can materially impact the results of this financial plan.

The simulation of returns at the individual asset, account and/or portfolio level drives the investment projections and proposed financial plan. In all cases investment projections are not to be considered definitive estimates of how the individual assets you own now or in the future will perform. Therefore, it is important that you recognize that the comparisons shown may include comparisons of two asset allocation models—the asset allocation of your current portfolio and the asset allocation projected in our proposed plan—and not comparisons of the individual securities you own. Model comparisons and the projected rates of return are based on past performance of the relevant asset classes. Past performance is not a guarantee of future results. No future rate of return can be predicted with certainty.

The report that follows does not make specific investment recommendations or analyze particular securities. Rather, the report typically contains a proposed asset allocation model based upon your stated risk tolerance, age, current asset allocation and value of your assets. The asset allocation models we use are continuously re-evaluated and are periodically changed as a result. We are under no obligation to revise any financial planning report already prepared if an allocation model is changed after it is issued to you.

Actual results are influenced by events that are both within and outside of your control. The rates actually returned by asset classes will differ from our projections. The rates actually returned by any allocation model noted within the financial plan will likely differ from those returned by any individual portfolio of securities constructed to follow a specific allocation model. Any rate of return shown or used in the financial plan is not intended to predict nor guarantee the actual results of an investment product.

Disclaimer

IMPORTANT: *Investments in stocks, bonds, mutual funds, and other securities are not bank products, are not FDIC insured, and may be subject to loss of principal.*

We have read and understand the above information and disclosures. We understand the basis upon which the report that follows was prepared. We recognize the nature of the asset allocation comparisons and estimated returns as illustrations only. We acknowledge that the report may contain a recommendation for adjusting the asset allocation of our current investment portfolio(s), but it does not provide any guaranteed rates of return, advice on particular securities or any specific legal, tax or accounting advice.

Summary

Jack & Jill Flash

At the End of the Senior Generation's Lifetime in 2041	Minimum Distributions	Accelerated Distributions
Cumulative IRA distributions to senior generation	4,716,221	4,353,327
IRA balance	9,965,515	6,980,029
Taxable investment balance	3,883,802	2,566,333
Combined balances	13,849,317	9,546,362
Estate taxes	-5,539,727	-3,818,545
IRD deduction	2,989,655	2,094,009
Income tax assuming total IRA distribution	-2,971,717	-2,081,445
Cumulative gifts [informational purposes only]	NA	674,700
Gift fund balance	NA	1,954,302
Net to heirs	5,337,874	5,600,675

Accelerated distributions advantage	262,801
Present value of planning advantage @ 3.0%	114,874

At the End of the Heir's Lifetime in 2077	Minimum Distributions	Accelerated Distributions
Cumulative IRA distributions to heirs	43,850,371	30,713,600
IRA balance	0	0
Income tax assuming total IRA distribution	0	0
After-tax IRA funds	0	0
Taxable investment balance	56,949,747	39,118,204
Gift fund balance	NA	16,310,145
Net amount available to heirs before 2nd generation death taxes	56,949,747	55,428,349

Minimum distributions advantage	1,521,398
Present value of planning advantage @ 3.0%	229,454

This analysis assumes that accelerated distributions are used to fund a lifetime gifting program, with the gifts used to purchase life insurance covering the senior generation.

Summary

Jack & Jill Flash

This analysis assumes that accelerated distributions are used to fund a lifetime gifting program, with the gifts used to purchase life insurance covering the senior generation.

Assumptions

Life Insurance in Accelerated Distributions Scenario

Gifts are used to fund insurance	Yes
Insured	Second-to-die
Type of Irrevocable life insurance trust	Funded
If Funded, first-year premium	40,000
If Funded, inc/-dec in premium	0.0%
First premium year	2014
Last premium year	2028
Initial death benefit	1,800,000
Death benefit growth rate	0.0%

Other

Gift fund assets are available to pay death taxes	Yes
---	-----

Annual Net to Heirs Comparison

Jack & Jill Flash

The chart above illustrates the advantages or disadvantages of receiving only required minimum distributions over the planning horizon, in order to maximize the deferral of income taxes. The alternative distribution strategy involves making additional distributions, the after-tax proceeds of which are transferred to a trust for the benefit of heirs. Through 2041, amounts represent the net after-tax transfer to heirs, assuming income taxes were paid on a total distribution of IRA funds. Amounts shown from 2042 onward represent the after-tax assets available to heirs, assuming death taxes were paid in 2041 but IRAs were transferred to heirs intact. Thereafter, it is assumed that only minimum distributions are received.
